Charles Nicholas Hales

Bibliography
Charles Nicholas Hales—Bibliography

(36) Hales CN (1967) Plasma levels of glucose, non-esterified fatty acid, glycerol and insulin four years before the onset of diabetic ketosis. Lancet ii, 389-390.

(65) Hales CN (1970) Effects of local anaesthetics on the hormonal control of rat isolated fat cells. Diabetologia 6, 47.

(86) Hales CN (1972) Immunological techniques in diabetes research. Diabetologia 8, 229-235.

Brons G, Newby AC & Hales CN (1982) Glucocorticoid and growth hormone stimulate division of rat insulinoma cells in defined tissue culture medium. Diabetologia 23, 158A.

Carrington CA, Rubery ED & Hales CN (1985) Five new cell lines which produce insulin. Diabetic Med. 2, 326A.

Ashford MLJ, Hales CN & Sturgess NC (1986) A calcium-activated non-selective cation channel in a rat insulinoma cell line. J. Physiol. 380, 23P.

Ashford MLJ, Hales CN & Sturgess NC (1986) Adenosine triphosphate inhibits the activity of the calcium-activated non-selective cation channel in a rat insulinoma cell. J. Physiol. 381, 116P.

Sturgess NC, Hales CN & Ashford MLJ (1986) Inhibition of a calcium-activated, non-selective cation channel, in a rat insulinoma cell line, by adenine derivatives. FEBS Lett. 208, 397-400.

Hales CN, Ashford MLJ, Gardner NJ & Pechet TTV (1986) Metabolite-stimulated insulin secretion by a cell line correlates with changes in cell ATP content. Diabetologia 29, 545A.

1989

Nagi DK, Hendra TJ, Temple RC, Clark PMS, Schneider AE, Hales CN & Yudkin JS (1989) Split proinsulin and not insulin may be a risk factor for atherogenesis in non-insulin dependent diabetic subjects. Diabetic Med. 6 (Suppl 1), A34.

Ashford MLJ, Hales CN & Kozlowski RZ (1989) Diazoxide, but not BRL 34915, activates ATP-sensitive potassium channels in a rat insulinoma cell line. J. Physiol. 409, 53P.

1990

proinsulin with cardiovascular risk factors in Type 2 (non-insulin-dependent) diabetic subjects. Diabetologia 33, 532-537.

(229) Rayman G, Clark PMS, Schneider AE & Hales CN (1990) The first phase insulin response to intravenous glucose is highly reproducible. Diabetologia 33, 631-634.

Byrne CD, Wareham NJ, Day NE, McLeish R, Williams DRR & Hales CN (1995) Decreased non-esterified fatty acid suppression and features of the insulin resistance syndrome occur in a sub-group of individuals with normal glucose tolerance. Diabetologia 38, 1358-1366.

Godfrey K, Hales CN, Osmond C, Barker DJP & Taylor KP (1996) Relation of cord plasma concentrations of proinsulin, 32-33 split proinsulin, insulin and C-peptide to placental weight and the baby’s size and proportions at birth. Early Hum. Dev. 46, 129-140.

Jennings BJ, Ozanne SE, Dorling MW & Hales CN (1999) Early growth determines longevity in male rats and may be related to telomere shortening in the kidney. FEBS Lett. 448, 4-8.

Ozanne SE & Hales CN (2001) The fetal origins of Type 2 diabetes. Pediatric Res. 50 (Suppl), 2A.

Lewis RM, Petry CJ, Ozanne SE & Hales CN (2001) Effects of maternal iron restriction in the rat on blood pressure, glucose tolerance and serum lipids in the 3 month old offspring. Pediatric Res. 50 (Suppl), 26A.
